### Helping Molweni's Animals – caring when no one else does

Julia, the founder of No Less Love, focuses her energy on the animals of Molweni Township, as she discovered that no one else was helping them.

These animals endure harsh conditions all year round, left to freeze during the winter without shelter and suffer under the blazing summer sun. They struggle to find food and water, and many are painfully thin, scavenging for whatever scraps they can find. Sadly, in their desperation, they're often seen as a problem, and some are cruelly beaten, stabbed, or burned. Kennels would not only provide warmth during freezing winter nights but also offer shade and relief in the hot, humid summer. Along with food and water, these small comforts would make a huge difference in their lives.

With this in mind, we decided to collect as much as we could to increase their comfort and assist Julia in her efforts.

Our initial goal for the region was to collect 30 tins of animal food. While we didn't reach the target, we managed to gather some cat and dog kibble, two packets of hooves, two dog bowls, and a treat bone.

We hope to continue our collection over the next two months.
